DETAILED ACTION

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 38-40, directed to the species of embodiment 2 no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASON FOR ALLOWANCE

The prior art of record do no teach or suggest, in the claimed combination thereof, a multi-stable magnetic article defining a plurality of spaced apart parallel magnetic axes, comprising first and second non-magnetic material plates, each includes a plurality of magnets disposed for movement therewith, wherein the first and second plates being generally juxtaposed and independently transformable in respective parallel planes transverse to the axes, between: (i) a stable closed orientation wherein the first and second plates are essentially superposed, and wherein at least a plurality of the first and second magnets form essentially superposed pairs, each of the superposed pairs containing one of the first magnets and one of the second magnets
